

KULDEEP AMRELIYA

Software Engineer | Full Stack Developer | Ai Engineer

Ahmedabad, Gujarat | +91 9913583491 | kamreliya9@gmail.com

PROFESSIONAL SUMMARY

Python Full Stack Developer and Software Engineer with hands-on experience building scalable web applications, RESTful APIs, and AI-powered solutions using Python, FastAPI, React, PostgreSQL, and modern backend technologies. Experienced in developing production-grade applications involving authentication, document intelligence, semantic search, and LLM integration. Strong foundation in software engineering principles, API design, database management, and end-to-end application development, with practical industry experience delivering enterprise solutions in Agile environments.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML5, CSS3

Frontend: JavaScript, React.js, Vite, Tailwind CSS

Backend: Python, FastAPI, Flask, REST APIs, SQLAlchemy, Django

Databases: PostgreSQL, Redis, FAISS, ChromaDB

AI/ML & Generative AI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, LangGraph, AI Agents, Prompt Engineering, Semantic Search, Vector Embeddings, MCP (Model Context Protocol), Hugging Face Transformers, scikit-learn

Speech AI: Faster-Whisper, Whisper, Silero VAD, Speech-to-Text (STT), Text-to-Speech (TTS)

Developer Tools: Git, GitHub, Docker, Postman, Uvicorn

Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), API Design, Authentication (OAuth 2.0, JWT), Database Design, Agile/Scrum

PROFESSIONAL EXPERIENCE

AI/ML Engineer Intern

E-Procurement Technologies Ltd. (Tender Tiger) | Jan 2026 – Jul 2026

Tech Stack: Python, FastAPI, PostgreSQL, LangChain, LangGraph, Qwen, FAISS, Redis, OAuth 2.0, MCP

- Developed backend services and RESTful APIs using **FastAPI** for enterprise GenAI applications, integrating AI workflows with databases and external services.
- Built **RAG pipelines** using LangChain, LangGraph, Qwen, FAISS, and PostgreSQL for semantic document retrieval and intelligent question answering.
- Designed an **OAuth 2.0 secured MCP server** with custom tool integrations to automate enterprise workflows, including Gmail automation.
- Contributed to AI-powered document intelligence solutions for information extraction, Go/No-Go recommendations, and agentic workflow automation.

Data & AI Intern

CSRBOX | 2025

Tech Stack: Python, Pandas, scikit-learn, Tableau

- Performed data preprocessing, cleaning, and exploratory analysis on real-world datasets using Python and Pandas.
- Applied machine learning and analytical techniques to support data-driven workflows and insight generation.
- Developed dashboards and visual reports for data interpretation and presentation.

PROJECTS

RAG Document Intelligence System (Groot) | ReactJs, FastAPI, LangGraph, FAISS, PostgreSQL, Redis, Qwen 2.5

- Developed a production-ready **LLM-powered Retrieval-Augmented Generation (RAG)** assistant using **Qwen**, **LangChain**, and **LangGraph** for intelligent document understanding and multi-turn conversations.
- Built a FastAPI backend integrating **FAISS**, PostgreSQL, Redis, OCR, spreadsheet analytics, and web search to deliver accurate, context-aware responses.
- Built an interactive AI web app to upload, chat with, and search enterprise documents in real time.

Fit Readout – Resume & JD Matcher | React.js, Vite, Tailwind CSS, FastAPI, SQLite, SQLAlchemy, Groq LLaMA

- Developed an **LLM-powered** Resume–JD matching platform using **Groq LLaMA** for structured profile extraction, semantic skill mapping, and explainable ATS analysis.
- Built a deterministic Python scoring engine with FastAPI APIs, document parsing, requirement auditing, and persistent match history using SQLite and SQLAlchemy.
- Built a responsive React dashboard for document uploads, ATS report visualization, and AI-powered resume evaluation.

CineMind – Movie Recommendation System | React.js, Vite, FastAPI, scikit-learn, Pandas, TMDB API

- Developed a full-stack movie recommendation platform with a **React.js frontend** and **FastAPI backend** for personalized movie discovery.
- Built FastAPI REST APIs integrating recommendation models with TMDB services for real-time movie search and metadata retrieval.
- Designed a responsive user interface featuring movie search, recommendations, and seamless frontend-backend integration.

EDUCATION

B.E. in Information Technology | SAL College of Engineering, Gujarat Technological University (GTU) | 2022 – 2026 | CGPA: 8.68

H.S.C. — Dipak Shikshan Sankul, 2022 | S.S.C. — Dipak Shikshan Sankul, 2020

RESEARCH & CERTIFICATIONS

Microsoft Data & AI Internship Program, 2025 | Published Research Paper – IJSREM Journal, 2025
